

ACF Components & Fasteners, Inc. REACH Statement

ACF Components & Fasteners, Inc. is a distributor of fasteners, electronic components, supplies and equipment. Under the structure of the REACH regulation, ACF is primarily a “supplier of articles with no intended release” and as such, ACF has no responsibility to register any of the products we distribute.

ACF Components & Fasteners, Inc. views our responsibility as a distributor is to pass information up and down the supply chain as it becomes available. In this respect, ACF Components & Fasteners, Inc. has and will continue to work diligently with its suppliers to determine whether any of the articles we supply contain SVHC (Substances of Very High Concern) in a concentration above 0.1% (weight/weight).

To the best of our knowledge at this time, ACF Components & Fasteners, Inc. suppliers fall under the “articles category” and fall within the specified guidelines as identified by the European Chemicals Agency (ECHA). We will continue to monitor the situation as the list of SVHC is updated. The current number of substances on the candidate list is 173. This list was last updated on Jan. 12, 2017.

It should be noted, from ACF Components & Fasteners, Inc perspective, REACH is similar to RoHS. ACF Components & Fasteners, Inc. globally distributes a very wide selection of products and suppliers. As with RoHS, not all products we sell will be REACH compliant at one time. For this reason, ACF Components & Fasteners, Inc. cannot sign a global agreement on REACH Compliance. Customers must take an active role in understanding environmental compliance of product and selecting products accordingly.
